### 1. **\*\*Candy Land\*\***

Candy Land is a classic board game that is perfect for teaching kids about counting and number recognition. The game is simple to play: players roll a dice and move their pieces along the board, following the path of candy-colored squares. The first player to reach the end of the board wins.

Chutes and Ladders is a classic board game that is great for teaching kids about numbers and counting.

### **3. \*\*Operation\*\***

Operation is a classic game that is perfect for teaching kids about parts of the body and medical procedures. The game is played on a board with a patient's body, and players use tweezers to remove different body parts. If a player touches the sides of the body with the tweezers, they get a shock and lose their turn.

Operation is a great way to teach kids about human anatomy, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

#### 4. **\*\*Jenga\*\***

Jenga is a classic game that is perfect for teaching kids about balance and physics. The game is played with a tower of wooden blocks, and players take turns removing blocks from the tower one at a time. The tower becomes more and more unstable as the game progresses, and the last player to remove a block without causing the tower to collapse wins.

Jenga is a great way to teach kids about balance and physics, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

Jenga is a classic game that is perfect for teaching kids about balance and physics.

## 5. **\*\*Connect Four\*\***

Connect Four is a classic game that is perfect for teaching kids about strategy and critical thinking. The game is played on a board with a grid of holes, and players take turns dropping their colored pieces into the holes. The first player to get four of their pieces in a row, either horizontally, vertically, or diagonally, wins.

Connect Four is a great way to teach kids about strategy and critical thinking, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

## 6. **\*\*Battleship\*\***

Battleship is a classic game that is perfect for teaching kids about strategy and critical thinking. The game is played on a board with a grid of squares, and players take turns trying to sink their opponent's ships. Players can either guess where their opponent's ships are located or use logic to deduce their locations.

Battleship is a great way to teach kids about strategy and critical thinking, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

Battleship is a classic game that is perfect for teaching kids about strategy and critical thinking.

## 7. **\*\*Uno\*\***

Uno is a classic card game that is perfect for teaching kids about numbers and colors. The game is played with a deck of cards with different numbers and colors, and players take turns playing cards that match the number or color of the card on top of the discard pile. The first player to get rid of all of their cards wins.

Uno is a great way to teach kids about numbers and colors, as well as basic math skills. The game can also help kids develop their fine motor skills and their ability to follow directions.

## 8. **\*\*Go Fish\*\***

Go Fish is a classic card game that is perfect for teaching kids about pairs and probability. The game is played with a deck of cards, and players take turns asking each other if they have any cards of a certain rank. If a player has a card of that rank, they must give it to the player who asked. The first player to collect all four cards of a rank wins.

Go Fish is a great way to teach kids about pairs and probability, as well as basic math skills. The game can also help kids develop their fine motor skills and their ability to follow directions.

Go Fish is a classic card game that is perfect for teaching kids about pairs and probability.

## 9. **\*\*Simon\*\***

Simon is a classic electronic game that is perfect for teaching kids about memory and sequencing. The game is played with a device that has four colored buttons, and players must repeat a sequence of lights and sounds that the device produces. The sequence gets longer and more complicated as the game progresses.

Simon is a great way to teach kids about memory and sequencing, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

## 10. **\*\*Mastermind\*\***

Mastermind is a classic game that is perfect for teaching kids about logic and deduction. The game is played with a board with a grid of holes, and players take turns trying to guess a secret code of colored pegs. Players receive feedback after each guess, and they must use this feedback to deduce the secret code.

Mastermind is a great way to teach kids about logic and deduction, as well as fine motor skills and hand-eye coordination. The game can also help kids develop their problem-solving skills.

Mastermind is a classic game that is perfect for teaching kids about logic and deduction.

These are just a few of the many family favorite games that can help your child learn math through play. By playing these games together, you can make learning math fun and engaging for your child.

So next time you're looking for a fun way to spend time with your family, reach for one of these
