Types of Logical Reasoning Questions

There are three main types of logical reasoning questions on the LSAT:

- **Flaw questions** ask you to identify a flaw in the argument's reasoning.

- **Weaken questions** ask you to find a statement that would weaken the argument's .
- **Strengthen questions** ask you to find a statement that would strengthen the argument's .

How to Approach Logical Reasoning Questions

When approaching a logical reasoning question, it is important to first identify the type of question you are being asked. Once you have identified the type of question, you can begin to analyze the argument. The following steps can help you analyze a logical reasoning argument:

1. **Read the argument carefully.** Make sure you understand the main points of the argument and the that the author is trying to draw.
2. **Identify the premises and .** The premises are the statements that support the . The is the statement that the author is trying to prove.
3. **Evaluate the premises.** Are the premises true? Are they relevant to the Do they support the logically?
4. **Identify any flaws in the argument.** Are there any fallacies in the argument's reasoning? Are there any assumptions that are not supported by evidence?
5. **Answer the question.** Once you have analyzed the argument, you can answer the question that you are being asked.
