

The Correct Answer to Every Moral Question, According to Michael Schur

Michael Schur, the creator of *The Good Place* and *Parks and Recreation*, has a simple answer to every moral question: "What would a good person do?"

SUMMARY OF HOW TO BE PERFECT: THE CORRECT ANSWER TO EVERY MORAL QUESTION BY MICHAEL SCHUR

It's not a new idea, of course. Philosophers have been debating the nature of good and evil for centuries. But Schur's approach is refreshingly straightforward. He believes that there is no one right answer to any moral question. Instead, the best we can do is try to figure out what a good person would do in that situation.

Of course, that's not always easy. Sometimes, the right thing to do is not clear. But Schur believes that if we approach moral questions with the intention of ng good, we're more likely to come to the right answer.

Schur's approach to morality is based on the idea that we are all capable of being good people. He believes that we all have the potential to make good choices, even in difficult situations.

This is a powerful message, especially in a world that can often seem dark and cynical. It's a reminder that we all have the power to make a difference, and that we should never give up on trying to be good people.

Here are some examples of how Schur's approach to morality can be applied to real-world situations:

- **Should I lie to my friend to protect their feelings?**
- **Should I cheat on my taxes to save money?**
- **Should I steal food from a store if I'm hungry?**

There is no one right answer to any of these questions. But if we approach them with the intention of doing good, we're more likely to come to the right answer.

In the first example, lying to our friend may protect their feelings in the short term, but it could damage our friendship in the long term. A good person would be honest with their friend, even if it's difficult.

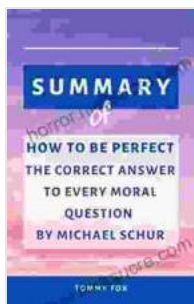

In the second example, cheating on our taxes may save us money in the short term, but it could lead to legal problems down the road. A good person would pay their taxes, even if it's inconvenient.

In the third example, stealing food from a store may satisfy our hunger in the short term, but it could lead to us being arrested or banned from the

store. A good person would find a way to get food without stealing.

It's not always easy to do the right thing. But if we approach moral questions with the intention of doing good, we're more likely to come to the right answer.

Michael Schur's approach to morality is a simple one, but it's a powerful one. It's a reminder that we all have the power to make a difference, and that we should never give up on trying to be good people.
